

READY TO DISCOVER LIFE  
BEYOND PAIN?

Now offering

EVOKE

A new kind of pain relief  
— one that listens,  
adapts, and lasts.

[This is a Preview. Download Email Files HERE.](#)

Dear Patient,

We're pleased to share that our practice is now offering the **Evoke™ SmartSCS™ System**, a next-generation spinal cord stimulation (SCS) therapy for chronic pain designed to work in sync with your body.

Evoke™ SmartSCS™ Therapy uses real-time feedback from your nervous system and automatically adapts **over 4 million times per day\*** to help provide consistent, personalized pain relief. It begins with a short trial period so you can experience the therapy and see if it may help before considering a long-term implant.

Could SCS Be Right for You?

Your pain is  
constant and  
has lasted more  
than 6 months

You experience  
chronic  
nerve-related  
pain

You haven't  
found relief with  
other  
treatments

If you've been living with chronic pain, Evoke™ SmartSCS™ Therapy may be an option worth exploring.

**Call the office to learn more about Evoke™ Therapy.**

Warm regards,  
**[Practice Name]**

\*Stimulation adjustments are made at the same rate as frequency. 4+ million adjustments per day is based on 50Hz.
